Setting of the seal :

Technical Data

Material

Housing: Polyamide (PA)

Ribbon:

Twisted metal wire, white plastic coated 0.30/0.60 \varnothing 1,4 mm

Tensile strength (loop)

Twisted metal wire, plastic coated: ca. 10 daN

Numbering

Directly laser marked on material

S & L tag: 6 digits

M & XL tag: 11 digits

Barcode & numbering

Directly laser marked on material

XL tag:

- Barcode 128C : 11 digits

- Barcode 39 : 5 digits

- Barcode 2/5 interleaved : 11 digits + check digit

Colour

Pink, yellow, grey, white, apricot, green, purple (pastel colour)

Customer name/logo

Directly laser marked on material

or foil printed 1 standard colour

Packing

Bunches of 50 seals, box of 1000 seals

Product Features and Benefits

Long lengths : the length of the ribbon from 250 mm to 1000 mm enables many applications which are currently not possible with other seals

Fast closure of the seal without tools

Ribbon diameter (\varnothing 1.4 mm) fits small eyelets

Various colours for logistical functions (colour coding)

Customer name/logo for clear identification

Bar-coding ensures fast and accurate data capture

The laser used for marking provides a good contrast for reading, requires no additives and is therefore environmentally
