

P/N: 90004

Hold trigger down to cut and release trigger stop.

Jaw reset button.

PHOENIX CORDLESS BOLT SEAL CUTTER

Silverback's 'Phoenix Cordless Bolt Seal Cutter' is safe, portable and convenient. Features a simple one button cut and a automated jaw opening/reset button. Comes with a OLED screen to manage battery life and maintenance during operation.

'Phoenix Cordless Bolt Seal Cutter' takes away the risk of strain injuries when using traditional heavy (up to 5.5kg) manual bolt cutters and also potential for eye injuries often caused by projectile seal parts during cutting.

'Phoenix Cordless Bolt Seal Cutter' is a lightweight (3.5kg) and balanced device, making the job of cutting bolt seals off containers located on ground or up high on trailers an effortless and safe task that anyone in your business can do.

Let the 'Phoenix Cordless Bolt Seal Cutter' renew the safety and efficiency of bolt seal removal in your business. Suitable for cutting ISO import/export bolt seals and mini bolt seals.

OLED screen

Features:

- OLED screen for charge level, number of cuts completed and other device functions or alerts.
- Hold trigger down to cut and release trigger to stop.
- Also features a separate jaw reset button.
- Comfortable ergonomic design for frequent and continuous use.
- Tool weight with 1.5Ah battery and cutting head fitted 3.5kg. vs. 900mm manual bolt cutter 5.4kgs+/-.
- Cutting cycle: 2.5~5sec.
- Cutting range: Max - 12mm diameter, suitable for cutting mini bolt seal and ISO export bolt seal.
- No projectile pieces of steel, as the cutter slowly crushes and cuts the bolt seal.
- Battery re-charge time is approx 30mins for 1.5Ah.
